THE WEEKLY OF ADVANCED TECHNOLOGY

1001 VERMONT AVENUE, N.W., WASHINGTON, D.C. 20005 / Sterling 3-5400 / TWX: 202-965-0566 / CABLE: AMERAV

Dear Sir, *6 1/2¢* a week will buy you...

...M/R's SPACE COMMUNICATIONS Report in January,

...M/R's DOD/MILITARY SYSTEMS Issue in March,

...M/R's WORLD MISSILE/SPACE ENCYCLOPEDIA in July,

...M/R's 6th Annual NASA REPORT in November,

and...MISSILES AND ROCKETS regular weekly coverage of defense and space technical developments.

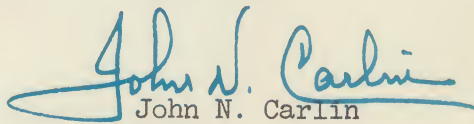

M/R's industry-trained editors give you full technical coverage of Missile/Space Systems & Subsystems...Electronics...Advanced Materials...Propulsion & Propellants...Ground Support Equipment...Communications...Space Medicine...Oceanology...ASW...in addition to accurate and timely reports of latest industry trends.

Your *6 1/2¢* weekly expenditure buys you 153 weekly issues - - plus a minimum of 12 special emphasis reports during your three-year subscription term. It's an offer unmatched by any other missile/space or aerospace publication.

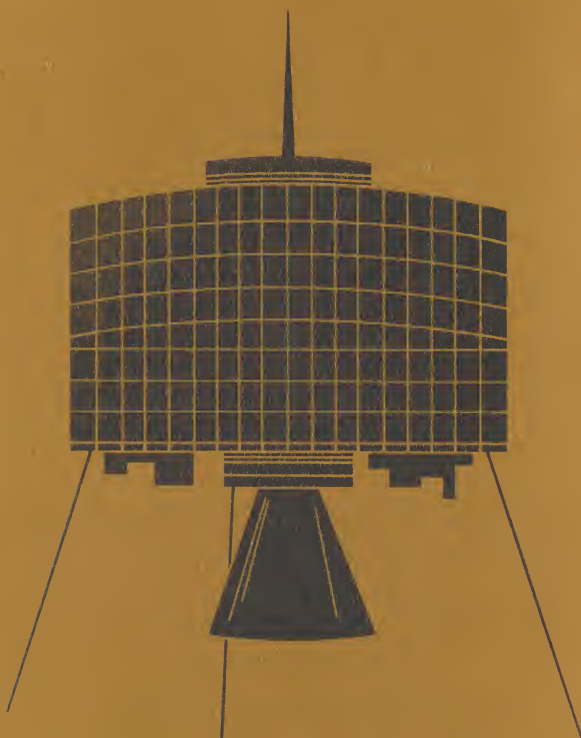

Order MISSILES AND ROCKETS today and your subscription will start with the SPACE COMMUNICATIONS Special Report in January. This outstanding issue gives you the most current, detailed information available on Military and Commercial use of advanced satellite systems for telecommunications. It's another first in MISSILES AND ROCKETS technical reporting.

1966 shows every promise of being one of the most technologically active and exciting years in defense and space industries. Don't miss an issue! Just complete and return the enclosed order card today for immediate MISSILES AND ROCKETS service. No need to send payment now - - we'll be glad to bill you later.

Sincerely,

John N. Carlin
Director, Circulation

P.S. If you currently subscribe to MISSILES AND ROCKETS, please pass this offer along to an interested business associate.

missiles and rockets weekly features

the countdown / exclusive reports of industry trends

missile/space week / late-breaking news in brief

technical countdown / important items on latest technical developments

industry week / corporate, labor and financial developments

products and processes

names in the news

contracts and procurements

when and where

special technical reports in depth

microelectronics

anti-submarine warfare

propulsion & propellants

biotechnology

oceanology

advanced materials

systems & subsystems

space medicine

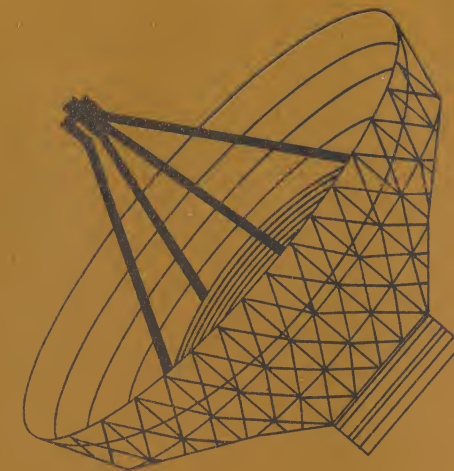

optics

astrophysics

space electronics / regular monthly feature with photographs and descriptions of latest electronics products and techniques

astrolog / complete bi-monthly reports on current status of all U.S. missile and space programs

51 issues per year at 6½¢ a week (3-year domestic rate)

SPACE COMMUNICATIONS

SPACE COMMUNICATIONS

Military and commercial use of space communications will have a major impact on your industry! An estimated \$200 million will be spent in the next four years with defense and space-oriented firms for advanced research, program definition and hardware development.

What engineering skills will be most needed?
Will you and your organization participate?
What new job opportunities will develop?

M/R's Space Communications Report gives you the most current, detailed information available on military and commercial satellite communications systems. Coverage includes all major components, launch vehicles, satellites, flight hardware, antennas, ground terminals, computers and special control centers.

The issue in brief:

Summary of Entire Field / Today's technical and international problems, technological growth and future applications of advanced satellite systems. Organization and participation of Comsat Corp.

Global Civil Communications via Satellites / Coverage of systems, hardware, capacities and techniques involved in: Syncom, Early Bird (F-1); Apollo/Commercial Comsat System; Advanced Global Comsat System; Associated Special Purpose Communications Systems. Coverage of international participation in terminals—present or planned.

Military Satellite Communications Programs / Report on systems, requirements, organizations and current approaches to Initial and Advanced Military Satellite Communications.

Advanced Concepts and Research / Includes highly advanced techniques for future systems in the late 1970's or early '80's.

Know what's ahead in Military and Commercial use of space! Order your copy of M/R's SPACE COMMUNICATIONS Report today.

M/R's SPACE COMMUNICATIONS Report is available as part of regular MISSILES AND ROCKETS subscription service . . . at no additional cost. Order Now . . . and your subscription will include three more outstanding special issues:

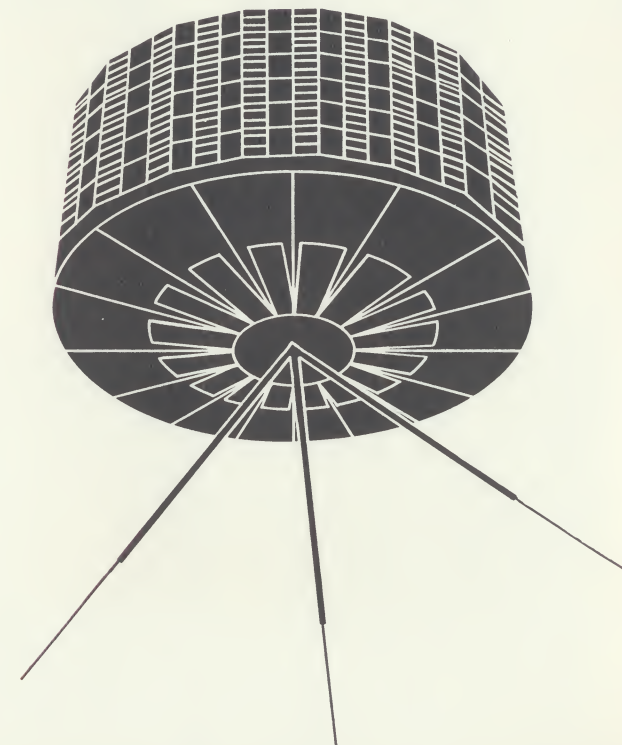

DOD/Military Systems Issue—March / Complete recap and forecast of the military's role in space . . . plus a special report on systems applications in Vietnam.

World Missile/Space Encyclopedia—July / Unique reference guide to U.S. and foreign Space Programs and Projects. Over 200 illustrated pages.

Annual NASA Report—November / NASA's current and future programs, projects, personnel and facilities. The most comprehensive report of its kind.

PLUS: complete weekly coverage of technical developments in defense/space and related industries.

Keep up-to-date with defense/space developments . . . Get the full technical story Now, not a month from now . . . Order MISSILES AND ROCKETS today!
